CALIBRATION

Valid To: January 31, 2021

Certificate Number: 4802.01

In recognition of the successful completion of the A2LA evaluation process, accreditation is granted to this laboratory to perform the following calibrations^{1,3}:

I. Ionizing Radiation & Radioactivity

Parameter/Equipment	Range	CMC ² (±)	Comments
Radiation Survey Instruments	1 µSv/hr to 16 mSv/hr	8.4 % of reading	JL Shepherd 28-6 calibrator
		9.7 % of reading	QSA Global model 773
Contamination Instruments	(1 to 9.9e ⁶) cpm	6.6 % of True Value	Ludlum model 500-2 pulser, Ludlum model 500 pulser

¹ This laboratory offers commercial calibration service.

² Calibration and Measurement Capability Uncertainty (CMC) is the smallest uncertainty of measurement that a laboratory can achieve within its scope of accreditation when performing more or less routine calibrations of nearly ideal measurement standards or nearly ideal measuring equipment. CMCs represent expanded uncertainties expressed at approximately the 95 % level of confidence, usually using a coverage factor of $k = 2$. The actual measurement uncertainty of a specific calibration performed by the laboratory may be greater than the CMC due to the behavior of the customer's device and to influences from the circumstances of the specific calibration.

³ This scope meets A2LA's *PI12 Flexible Scope Policy*.

Accredited Laboratory

A2LA has accredited

ALARA CONSULTANTS INC.

Edmonton, Alberta, CANADA

for technical competence in the field of

Calibration

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2005 *General requirements for the competence of testing and calibration laboratories*. This laboratory also meets R205 – Specific Requirements: Calibration Laboratory Accreditation Program. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system *(refer to joint ISO-ILAC-IAF Communiqué dated April 2017)*.

Presented this 13th day of March 2019.
